Docket No. 00279.209US2

CPI Ref. No. n/a

Clean Version of Specification Paragraphs

SYSTEM AND METHOD FOR DETECTION ENHANCEMENT PROGRAMMING

Applicant: James O. Gilkerson et al.

Serial No.: 10/025,958

Please substitute the paragraphs of the Specification with the following paragraphs.

Please replace the paragraph beginning on page 15, line 6, with the following:

In one embodiment, the user accesses the detection parameters for a zone by selecting the respective detection button 76 and accesses the therapy parameters for a zone by selecting the respective therapy button 78. The user selects the rate threshold value in order to change the rate threshold for that zone. And the number of tachyarrhythmia zones can be modified by selecting one of the number buttons beneath the "# Zones" label.

Please replace the paragraph beginning on page 18, line 1, with the following:

Next, select the magnifying-glass icon to display enhancement parameter details. Detection enhancement details for VT-1 zone are shown in Figs. 4, 10 and 14. Detection enhancement details for VT zone are shown in Figs. 15 and 16.
